

IMPORT MULTIPLE RECIPES WITH XML/TXT FILES

Our configurator Multi-Recipe Project import feature is the fastest way to upload all your recipes from your packaging software like Cape Pack from Esko or TOPS. By importing XML or TXT files, you can leverage information that already exists with a few clicks and assess feasibility for all of your products. **On the top left Menu bar, select your Dashboard option and head over to 'Multi-Recipe Projects'.**

WHY YOU WIN

- Consistency:** Ensures precise placement and stacking according to optimal patterns.
- Accuracy:** Avoid typing errors by manually entering box, pallet and pattern information.
- Scalability:** Import multiple recipes and test/simulate all recipes for one or multiple lines.

Empower your packaging software investment and information further through our configurator and all the way to your URCap application.
