## IMPORT AN XML/ TXT FILE FROM PACKAGING SOFTWARE

Our configurator import feature is the fastest way to upload a recipe into your project. Importing an XML or TXT file from a packaging software like Cape Pack from Esko or TOPS, you can leverage information that already exists with a few clicks and assess feasibility for any of your products.
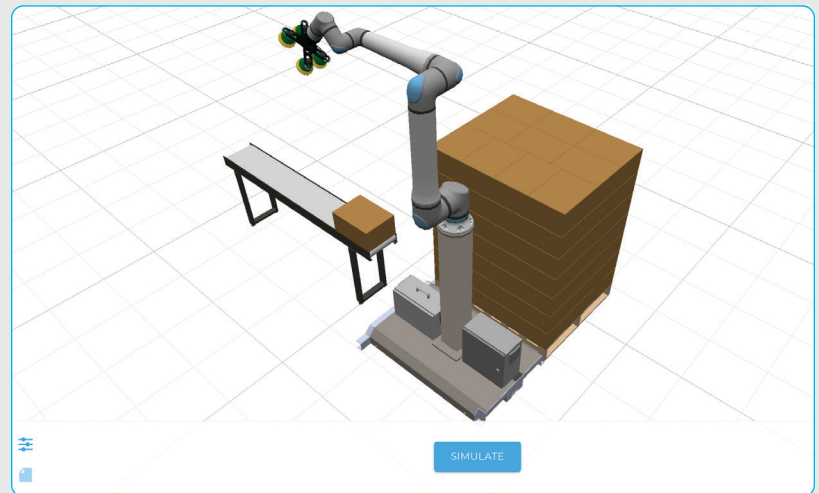

WHY YOU WIN

- **Consistency:** Ensures precise placement and stacking according to optimal patterns.

- **Accuracy:** Avoid typing errors by manually entering box, pallet and pattern information.

- **Scalability:** Import multiple recipes and test/simulate all recipes for one or multiple lines.

Empower your packaging software investment and information further through our configurator and all the way to your URCap application.

Packaging Software → Robotiq Configurator → URCap

1 On the top left Menu bar, **select the Import option**

ROBOTIQ

← Dashboard

My Project

▢ Duplicate

⬆ Import

⬇ Export

2 **Drag and drop your file** from your Packaging Software **or click the appropriate field shown** to add your file.

Import To Project ✕

Drag and drop or
click here to add your file.

TOPS | Cape Pack

✖   ✔

3 **Click Simulate** to see the palletizing solution in action.

SIMULATE

💡 **Tip:** You can import multiple recipes at once using the multi-recipe projects option in your dashboard. **See next course to learn more.**
