

TURNKEY PALLETIZING SOLUTION

A permanent fix for your staffing woes

" The ROI was a slam dunk. Smoothest equipment installation I have seen in 28 years. "

—Greg Thayer, VP, Cascade Coffee

AX Series

The AX Series uses a 7th axis as a linear transfer system to extend the robot's vertical reach. The AX Series excels by providing the fastest cycle times and highest reach of any comparable palletizing system—all in a compact footprint.

PE Series

The PE Series, ideal for settings with fewer pallet height variations, makes the most of limited spaces by mounting cobots on a pedestal, which maintains high performance in compact areas.

SET UP YOUR APPLICATION IN 3 EASY STEPS

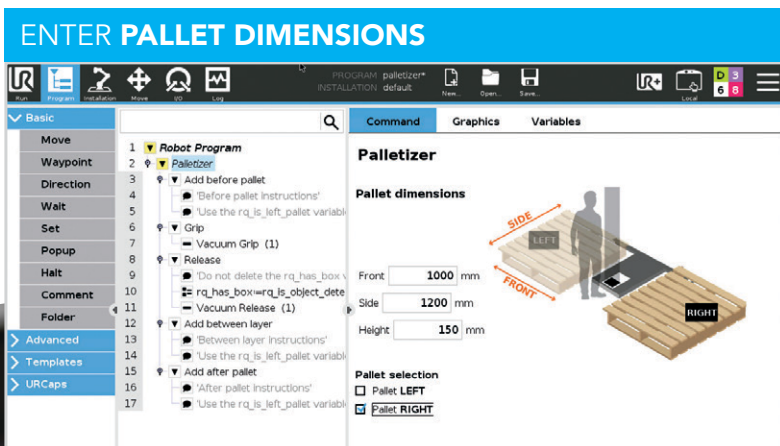

The Palletizing Solution is designed to make automation accessible, no matter your robotics knowledge level. All workers can operate and teach SKUs, risk-free.

Create a pallet pattern to automatically generate and optimize all trajectories and robot movements. The software stores hundreds of recipes (SKUs/pallets) for easier and faster changeovers.
